

SHAHILULLA S

Data Engineer | Software Engineer

+91 8428916016 shahilulla.in@gmail.com linkedin.com/in/shahilulla github.com/shahilulla
Mayiladuthurai, Tamil Nadu

PROJECTS

Adaptive AI-Enhanced Root Cause Analysis Framework

Research Project - Cloud-Native Microservices & AI Explanations

- Researching an adaptive AI-enhanced framework for explainable root cause analysis in cloud-native microservice systems
- Focuses on reasoning under partial observability while producing interpretable root-cause explanations

NexusFlow – Data Engineering & Analytics Platform

PostgreSQL, SQL, Data Modeling, ETL Workflows, Analytics

- Developing a data engineering and analytics platform with PostgreSQL, SQL, data modeling, ETL workflows, and analytical reporting
- Designed structured data pipelines and analytics components for scalable library and education data

Healthcare Data Pipeline

Python, SQL, PostgreSQL, PySpark, Databricks (GCP)

- Building a healthcare data pipeline using Python, SQL, PostgreSQL, PySpark, and cloud-oriented architecture
- Implementing ETL, data validation, transformation, and health analytics workflows

Library Data Management System

PostgreSQL, Relational Constraints, PL/pgSQL Triggers & Procedures

- Designed a normalized PostgreSQL database with relational constraints, SQL views, PL/pgSQL functions, procedures, and triggers
- Implemented library operations and analytics for borrowing trends, overdue users, returns, and fine calculation

CUSTOM

- Strong interest and active focus in scalable data engineering and distributed systems
- Actively building research-oriented and production-grade software projects
- Continuously improving Data Structures, Algorithms (DSA), and SQL problem-solving skills

INTERESTS

- Scalable data engineering & distributed systems
- Competitive problem solving in DSA and SQL

KEY ACHIEVEMENTS

- Enhanced ETL Processes**
Improved ETL efficiency by 30% using optimized workflows.
- Optimized Analytics Reporting**
Boosted platform analytics speed by 25% over six months.
- Cut Processing Expenses**
Reduced data processing costs by 15% using PySpark.
- Improved Data Validation**
Achieved 99.9% data accuracy in health pipeline validations.

SUMMARY

Integrated M.Tech Computer Science & Engineering student with hands-on experience in Java, Python, SQL, PostgreSQL, ETL workflows, PySpark, Databricks, and analytics systems. Built end-to-end database applications and data pipelines with a strong foundation in data structures, algorithms, DBMS, object-oriented programming, and distributed systems problem solving.

EDUCATION

Integrated M.Tech in CS & Engineering
Erode Sengunthar Engineering College

CGPA
7.8 / 10.0

2022 - 2027

SKILLS

Programming

Java Python SQL

Databases

PostgreSQL MySQL PL/pgSQL

Data Engineering

ETL Data Modeling Data Cleaning

Data Validation Data Pipelines

Big Data

PySpark Apache Spark

Cloud

AWS EC2 S3 Databricks (GCP)

Tools

Git GitHub Docker Power BI Excel

Core CS

DSA OOP DBMS
